

Datasheet

Product Name:	Alpha-Synuclein, C13, N15 Uniformly Labeled
Catalog #:	S-1104
Source:	Recombinant. A DNA sequence encoding the human alpha-synuclein, was expressed in E. coli and uniformly labeled with C13 and N15.
Molecular Weight:	15,251 Da theoretical
Protein Purity:	>95% by SDS-PAGE and Mass Spec.
Counter Ion:	Lyophilized in final buffer of 20 mM Tris/HCl, 100mM NaCl pH 7.4
Supplied As:	White lyophilized powder
Resuspension:	Resuspend in water at conc. of .1-1 mg/ml and briefly centrifuge sample to fully suspend the lyophilized pellet.
Storage:	-20°C
Description:	Alpha-Synuclein has been linked to autosomal dominant early onset Parkinson's Disease (PD). Alpha-Synuclein (α -Synuclein) is a 14 kD (140 amino acids) acidic presynaptic protein. It is a major component of PD aggregates and is implicated in the pathogenesis of PD and related neurodegenerative disorders. α -Synuclein accumulates in the brains of sporadic Parkinson's disease patients as a major component of Lewy bodies, which are intraneuronal cytoplasmic inclusions characteristic of Parkinson's disease. α -Synuclein appears to associate with other proteins that aggregate and is found in β -amyloid plaques and neuritic tangles in Alzheimer's disease ³ .
