

DATA SHEET

Product Name: Alpha-Synuclein, A30P, A53T Mutant

Catalog #: S-1006

Source: Recombinant. A DNA sequence encoding the human alpha-synuclein, A30P and A53T mutant sequences, was expressed in E. coli

Molecular Mass: 14,516 Da theoretical

Protein Purity: >95% by SDS-PAGE and Mass Spec.

Counter Ion: 20mM Tris-HCl, 100mM NaCl pH 7.4

Supplied As: White lyophilized powder

Resuspension: Resuspend in water at conc. of .1-1 mg/ml. Recommended to briefly centrifuge to ensure full resuspension of product.

Storage: -20°C

Description: Alpha-Synuclein (α -Synuclein) is a 14 kD (140 amino acids) acidic presynaptic protein and is a major component of Parkinson's Disease (PD) aggregates. α -Synuclein is implicated in the pathogenesis of PD and related neurodegenerative disorders. α -Synuclein also accumulates in the brains of sporadic PD patients as a major component of Lewy bodies, which are intraneuronal cytoplasmic inclusions characteristic of PD. α -Synuclein appears to associate with other proteins that aggregate and is found in beta-amyloid plaques and neuritic tangles in Alzheimer's disease³. rPeptide offers a wide array of synuclein products, including fragments, mutants, preformed fibrils, and labeled versions in addition to the wild-type protein. A double mutant (A30P/A53T) of α -Synuclein gene that has been linked to autosomal dominant early onset Parkinson's Disease (PD).
