

DATA SHEET

Product Name: Tau K19, C322S Mutant

Catalog #: T-1018

Source: Recombinant. Tau K19 is comprised of amino acids Q244-V275 plus V306-E372 from the full-length human tau sequence, with a mutation C322S.

Molecular Mass: 10,650 Da

Protein Purity: >90% by SDS-PAGE and Mass spec.

Counter Ion: 50mM MES, pH 6.8, 100mM NaCl, 0.5mM EGTA

Supplied As: White lyophilized powder

Resuspension: Resuspend in water at conc. of .1-1 mg/ml. Recommended to briefly centrifuge to ensure full resuspension of product.

Storage: -20°C

Description: The tau K19 fragment comprises the microtubule binding region of tau with repeat 2 omitted and the mutation C322S. The K19 fragment of tau has a higher propensity of aggregation than the full-length protein¹, with this mutant form serving as a non-aggregating control². Applications for this construct could include aggregation experiments, microtubule binding studies³ and acetyltransferase activity⁴.
